

## SAM® SPLINT – The Gold Standard in Splints

The SAM Splint is built from a thin core of aluminum alloy, sandwiched between two layers of closed-cell foam. When bent, the splint becomes extremely strong to support any fractured or injured limb.

- Lightweight
- Reusable
- Radiolucent
- Waterproof
- Compact
- Versatile

## SOFT SHELL® SPLINT & SAM® SUGAR TONG

*Immobilizes Soft Tissue Injuries, Wrist and Forearm Fractures*

The Soft Shell Splint combines the malleable properties of the successful SAM Splint with soft terrycloth fabric. The SAM Sugar Tong is used to immobilize wrist and distal forearm fractures. The product is designed to prevent pronation and supination (rotation) of the wrist and forearm by immobilizing the elbow.

- Easily & Quickly applied
- Comfortable for the patient
- Can be reapplied and reshaped
- Lightweight & Inexpensive

## SAM™ PELVIC SLING II – Stabilization of Pelvic Fractures with The Correct Force

The SAM Pelvic Sling II is the first and only force-controlled circumferential pelvic belt scientifically proven in peer-reviewed studies to safely and effectively reduce and stabilize open-book pelvic ring fractures. The SAM Pelvic Sling II offers a simple design with no detachable hardware. It is compact, easy to use (only three steps), and quick to apply (usually in less than one minute). Our standard size fits (without cutting or trimming) 98% of the adult population.
