

Puppet-shaped Infant Mask with
Fruit Fragrance

BABY is a compact and handy ultrasonic aerosol delivery system. It is recommended for infants, children and adults. Its absolute quietness and fastness in delivering medications make it a versatile portable nebulizer. Light-weight, easy to operate, with integrated mouthpiece and a support base for use on the table. It can be used as “hand-held” or “desk-type” unit depending on patient’s convenience. Automatic shut-off system after ten minutes in case of poor cooling or unintentional start of the device. Three different air flow settings to adjust treatment efficiency.
